Nevada Agency & Transfer Company is registered under the Exchange Act and their regulatory authority is the Securities and Exchange Commission.

## 4) Issuance History

A. The nature of each offering (e.g., Securities Act Rule 504, intrastate, etc.);

All common and preferred share issuances by the issuer from July 1, 2012 to June 30, 2013, July 1, 2013 to June 30, 2014 and from July 1, 2014 to June 30, 2015 have been issued in accordance with Rule 144.

The Issuer did not issue any warrants or options from July 1, 2012 to June 30, 2013, July 1, 2013 to June 30, 2014 and from July 1, 2014 to June 30, 2015.

B. Any jurisdictions where the offering was registered or qualified;

All common and preferred share issuances by the issuer July 1, 2012 to June 30, 2013, July 1, 2013 to June 30, 2014 and from July 1, 2014 to June 30, 2015 were issued as restricted securities in private issuances and did not require a registration.

C. The number of shares offered;

Incorporated by reference as follows:

Period	Description
7/1/12-6/30/13	Notes 6 & 7, Annual Report, June 30, 2013
7/1/13-6/30/14	Notes 6 & 7, Annual Report, June 30, 2014
7/1/14-6/30/15	Notes 6 & 7, Annual Report, June 30, 2015

D. The number of shares sold;

Incorporated by reference as follows:

Period	Description
7/1/12-6/30/13	Notes 6 & 7, Annual Report, June 30, 2013
7/1/13-6/30/14	Notes 6 & 7, Annual Report, June 30, 2014
7/1/14-6/30/15	Notes 6 & 7, Annual Report, June 30, 2015

E. The price at which the shares were offered, and the amount actually paid to the issuer;

Incorporated by reference as follows:

Period	Description
--------	-------------

7/1/12-6/30/13  
7/1/13-6/30/14  
7/1/14-6/30/15

Notes 6 & 7, Annual Report, June 30, 2013  
Notes 6 & 7, Annual Report, June 30, 2014  
Notes 6 & 7, Annual Report, June 30, 2015

F. The trading status of the shares:

All common and preferred share issuances by the issuer from July 1, 2012 to June 30, 2015 were initially issued as restricted in accordance with Rule 144.

G. Whether the certificates or other documents that evidence the shares contain a legend stating (1) that the shares have not been registered under the Securities Act and (2) setting forth or referring to the restrictions on transferability and sale of the shares under the Securities Act.

All common and preferred share issuances by the issuer from July 1, 2012 to June 30, 2015 were initially issued as restricted in accordance with Rule 144. Each certificate had a standard restricted legend stamp.

## 6) Describe the Issuer's Business, Products and Services

### A. Description of Our Business Operations

The Company acquired Evergreen Systems Incorporated ("ESI") effective as of September 19<sup>th</sup>, 2013. ESI is a development stage company currently developing multiple product lines targeted towards the emerging legal cannabis industry:

BlazeNow™, is a suite of mobile apps for the iOS and Android operating systems and a website (www.BlazeNow.com) designed to provide product and location specific advertising as well as a mutually beneficial consumer review system for dispensaries, doctors and delivery services to the burgeoning legal cannabis industry. Management believes that BlazeNow's advertising site and app should be superior to the current competition in both the design and functionality of the user interface and the quality of the back end software structure.

Energy Efficient LED Grow Lights – The systems under development are semi-proprietary in nature, however, each component, from the servers to the LED based lighting units, to the software being designed to control them, would be tailored to produce a system that can provide lighting, integrate with commercial climate control, video, alarm and HVAC systems in order to reduce total electricity consumption and help to reduce or eliminate many of the costly problems associated with indoor cultivation.

To the best of Management's knowledge, since inception, there has never been a period of time in which the company did not maintain operations and did not have a specific business plan and there has never been a period in which the Company had assets consisting of only cash or cash equivalents. Additionally, and to the best of Management's knowledge, the Company holds or has held, at all times,

non-cash assets including furniture, fixtures, equipment and intellectual and other physical property and, as such, is not now, and has never been, a “shell company”, as that term is defined in Rule 405 under the Securities Act of 1933.

During the fiscal year ended June 30, 2015, the Company continued to develop its energy efficient LED lighting business plan. The Company has developed LED grow light prototypes with a custom spectrum designed specifically for indoor cultivation and the integration of photovoltaic power systems to further reduce the costs associated with indoor cultivation. These prototypes began live agricultural testing in the fourth quarter of the fiscal year ending June 30, 2014. During the fiscal year ended June 30, 2012, the Company became engaged in defending a lawsuit regarding its former subsidiary, Silverado Mortgage Corporation and continues to do so to this date.

#### **B. Date and State of Incorporation**

Incorporation Date: February 26, 1987.

State of Incorporation: Nevada

Corporation File Number: C1326-1987

#### **C. Our Primary and Secondary SIC Codes**

511210 (Software publishers) and 335122 (Commercial, Industrial, and Institutional Electric Lighting Fixture Manufacturing).

#### **D. Our Fiscal Year End Date**

June 30

Management elected to change its fiscal year end from December 31 to June 30 in September of 2013.

#### **E. Principal Products and Services, and Their Markets**

The Company acquired Evergreen Systems Incorporated (“ESI”) effective as of September 19<sup>th</sup>, 2013. ESI is a development stage company currently developing multiple product lines targeted towards the emerging legal cannabis industry:

BlazeNow™, is a suite of mobile apps for the iOS and Android operating systems and a website (www.BlazeNow.com) designed to provide product and location specific advertising as well as a mutually beneficial consumer review system for dispensaries, doctors and delivery services in the burgeoning legal cannabis industry. Management believes that BlazeNow’s advertising site and app should be superior to the current competition in both the design and functionality of the user interface and the quality of the back end software structure.

To obtain a competitive edge over the current competition, BlazeNow™ intends to offer an extremely competitive pricing structure for companies wishing to advertise their location and product menus including a free basic option. The site/app is being designed to incorporate gamification<sup>1</sup> and a reward system into the consumer review portion of the service and to provide earned discounts for paying advertisers and consumer users of the site who are active in review participation. This is intended to greatly increase the paid advertiser customer base and to add value to the paid advertising options, as well as increase site traffic. BlazeNow™ expects to also offer traditional advertising space on the site for interested parties and to collect non-personal sales data for increased efficiency in advertising and eventual resale of relevant data.

---

<sup>1</sup> The application of typical elements of game playing (e.g., point scoring, competition with others, rules of play) to other areas of activity, typically as an online marketing technique to encourage engagement with a product or service. Source: The Oxford English Dictionary.

ESI intends to begin exploring development of foreign language versions of the software using gamification to monetize the any opportunities found for this service outside the United States.

During 2014, new Management also began to explore ancillary products and services related to the ever-expanding recreational and medical cannabis and industrial hemp industry. Management intends to use their knowledge and expertise to guide the Company's entry into this lucrative market. Potentially profitable opportunities in this industry include, but are not limited, to:

**Data Mining** - Management is currently in discussions with experts in the data mining industry to evaluate the future market of mining, analyzing and supplying detailed sales and product data to Fortune 500 companies interested in entering this industry. In the near term, this data would be useful to the Company in determining the most lucrative products and services to pursue and to provide expert consulting throughout the industry.

**Industry Consulting** – The Company's management and extensive network of industry professionals intends to provide professional consulting services to the legal recreational and medical cannabis markets, including state and local governments, legislators, licensed dispensaries and cultivations. Consulting is anticipated to also be available to those parties interested in obtaining licenses and current licensee's interested in production and branding of concentrates and edibles. The Company intends to use its extensive contacts to offer consulting services to countries where cannabis legalization and regulation legislation has passed or is imminent. As of now, these countries include Portugal, Canada, Israel and Uruguay.

**Product Packaging & Private Label** – The company intends to provide private label design and packaging for high demand items such as Portable Vaporizers (eVape Pens) for use with cartomizers/clearomizers as well as basic container and packaging needs for daily use at dispensaries. Vaporizer vapor delivery systems use an atomizer to decarboxylate cannabinoids such as Tetrahydrocannabinol (THC) and Cannabidiol (CBD) and deliver it to the patient or user without exposing them to the harmful effects of smoking.

**Nutrients** – As the cannabis industry is a largely unregulated industry, there is widespread use of pesticides and other cultivation chemicals that are unsafe for consumption and the environment. The company intends to research and test environmentally safe nutrients to promote high flower yields and eliminate crop-damaging pests such as root aphids, spider mites, and thrips in order to provide crops that are safer for human consumption.

**Equipment** – The Company intends to research and test indoor cultivation technologies including custom spectrum LED lights and Environmental Control Devices. The Company intends to research clean concentrate extraction methods and technologies such as Supercritical CO<sub>2</sub> that could ensure the safe delivery of medical grade extracts compared to the widespread use of the harmful solvent butane.

**Energy Efficient LED Grow Lights** – During 2012 and 13, previous management continued the development of energy efficient lighting systems. During 2014, current Management continues to investigate opportunities in energy efficient lighting and integrated cultivation automation systems.

The systems under development are semi-proprietary in nature, however, each component, from the servers to the LED based lighting units, to the software being designed to control them, would be tailored to produce a system that can provide lighting and integrate with commercial climate control, video, alarm and HVAC systems in order to reduce total electricity consumption and help to reduce or eliminate many of the costly problems associated with indoor cultivation.

The Company anticipates that the principal market for these products to initially be hydroponic equipment retailers and large scale produce and/or cannabis cultivators. However, the Company hopes to cost reduce the majority of its proposed product offerings to enable any consumer to garner the

benefits of reduced energy consumption and self sustainability that the products the Company is attempting to develop may provide.

The Company intends, when, and if, development concludes, to market its products to large-scale produce and cannabis cultivations, hydroponic equipment suppliers and directly to consumers through the Internet.

The Company has placed multiple prototypes with a potential first round customer in order to perform controlled testing of the Company's first functional prototype. The test is intended to provide detailed data as to the results of the LEDs in comparison to the current lighting technologies in use. The company intends to determine the feasibility of the customizable LED lighting system in replacing metal halide and high-pressure sodium lighting systems as the industry standard. The Company is negotiating with consultants to develop additional cultivation products it has envisioned such as effective and environmentally safe plant nutrients. The Company hopes to complete this process during 2014.

The market for lighting and climate control automation is highly competitive. As a proposed new entrant into this segment, the Company's position, relative to the competition, is insignificant. However, the Company believes that massive deficiencies exist in every competitive product on the market today, especially with regard to integration of the disparate components available, and believes, that if it can successfully bring the products envisioned to market, it should have substantial competitive advantages over its competition.

The sources and availability of raw materials for the products under development are many and varied. No specific supplier contracts have been entered into at this date. The Company currently is not dependent on any major customers; has no patents, trademarks, licenses, franchises, concessions, royalty agreements or labor contracts.

The Company may need to submit some or all of the products in development for radio interference testing and submit the results thereof to the Federal Communications Commission ("FCC"). No compliance testing is yet underway. The Company plans to become an Energy Star Partner with the Environmental Protection Agency ("EPA") and the Department of Energy ("DOE"). The Company intends to submit specific patents and trademarks for approval with the United States Patent and Trademark Office ("USPTO") if appropriate and necessary.

## **7) Describe the Issuer's Facilities**

The Company's principal corporate office is located at 6671 Las Vegas Boulevard South, Building D, Suite 210 PMB 24, Las Vegas, Nevada 89119-3273, where it rents conference facilities as well as mail, secretarial and reception services. The Company believes that this space is adequate for its current operations although it is seeking larger office space within which it plans to employ sales, development and IT staff as well as to house backup servers to augment the servers it currently has hosted through a third party provider. The company currently contracts with third parties who provide their own office space.

## **8) Officers, Directors, and Control Persons**

### **A. Names of Officers, Directors, and Control Persons.**

Jeremy E. Carr. President & Director

Since February 17, 2014, Mr. Carr has served as an officer and director of the Company. Prior to February 17, 2014, and during the past five years Mr. Carr has been involved in Equipment Leasing and Real Estate as a licensed Realtor.

EIF Inc, formerly Evergreen Investment Firm LLC is the owner of 1,000,000 shares of Class I Convertible Preferred Stock (100% of Class) and, as a result of its ownership thereof, holds 73.3% of the voting power of the Company, a controlling interest in the Company as of the date of this statement. Jeremy Carr holds 100% of the shares of EIF Inc.

**B. Legal/Disciplinary History.**

Not applicable.

**C. Beneficial Shareholders.**

Based on the latest shareholder lists in the possession of Management, and to the best knowledge of Management, there are no ten percent (10%) beneficial owners of the Company’s Common Stock.

To the best of Management’s knowledge, the following table lists all beneficial owners of more than ten percent (10%) of any voting class of the Company’s stock.

Title of Class	Name of Beneficial Owner	Address of Beneficial Owner	Amount & Nature of Beneficial Ownership	Percent of Class
Class I Convertible Preferred Stock	EIF Inc <sup>1</sup>	6671 Las Vegas Boulevard South Building D, Suite 210 PMB 24 Las Vegas, Nevada 89119-3273	1,000,000 Shares Held Solely	100%

<sup>1</sup> Jeremy E. Carr holds 100% of the shares of EIF Inc
